

Tempaus Order

Let the following be made known to all members of the Aalto community:

For a hundred years, Tempaus projects have been organized in my name. During this century, we have achieved tremendously as a community. Sheryl Tokyo and KY's Kunniamursu have joined this honorable cause after the founding of Aalto University. Together, we drive the society forward and make a difference in matters that are important to us.

As the economy tightens, workplace productivity has become increasingly crucial. Nevertheless, we should not forget about work for which you cannot set a price. Volunteer work is a community resource with a long history. It has also been the foundation upon which Tempaus has been built throughout history. Volunteer work has been a strong presence in the society over the years, embodied in the Finnish community spirit. It is ultimately about caring for others and genuine altruism, which are also reflected in small daily acts. In our view, volunteer work today does not receive the appreciation it deserves in society.

Dear Aalto Community! We have decided that during the tenth month's reign on earth, the most energetic individuals from each school of Aalto shall organize a spectacle the likes of which have never been seen! In the name of our collective will, we command you to participate in Tempaus about the value of volunteer work in Finnish society! Let us demonstrate the ability and will that is expected of us and highlight the **efforts of all hands**.
